**Visualizer™ Western Blot Detection Kit, rabbit
Chemiluminescent System**
Catalog # 64-202
Lot # 28866

Kit Components

Goat Anti-Rabbit IgG, HRP-Conjugate, Catalog # 12-348, Lot # 27525. One vial containing **500µg** of goat IgG, conjugated with horseradish peroxidase lyophilized from 0.02M potassium phosphate, 0.15M NaCl, pH 7.2, 10mg/ml BSA, 0.01% (w/v) gentamicin sulfate. For rehydration add 500µl of sterile, distilled water containing 50% glycerol to make a 1mg/ml stock solution. See page two for more information.
Note: This product is light sensitive.

Visualizer™ Detection Reagent A, Catalog # 20-275a. One vial containing **20ml**.

Visualizer™ Detection Reagent B, Catalog # 20-275b. Two vials containing **20ml** each.

Note: Visualizer™ components are light sensitive.

**FOR RESEARCH USE ONLY
NOT FOR USE IN HUMANS**

Kit Description

Product Description: The Visualizer™ Western Blot Detection Kit, using the provided HRP conjugated secondary antibody and detection reagents, is designed for the sensitive detection of proteins in chemiluminescent Western blots.

Quantity: 20 immunoblots per kit.

Storage and Stability: Stable for 18 months at 4°C from date of shipment. **Note:** Upon receipt, resuspend, aliquot and store Catalog # 12-348 at -20°C for optimal performance. Store Visualizer™ Detection Reagents at 4°C.

Use: Read the enclosed manual before use. Visualizer™ Western Blot Detection reagents are very sensitive and optimization of the individual assay components (antibodies, conjugates, membranes, etc.) need to be completed to minimize non-specific reactivities and supply the most robust results.

Quality Control Testing: The reagents in this kit have been matched to optimize the range and sensitivity of detection using various antibodies in Western blot assays.

Visualizer™ is a trademark of Upstate USA, Inc.

Technical Information for Kit Components

Goat Anti-Rabbit IgG, HRP-conjugate (goat polyclonal IgG)

Immunogen: Highly purified whole rabbit IgG.

Physical Form: Lyophilized powder.

Specificity: Specific for rabbit IgG heavy and light chains.

Storage and Stability: Lyophilized: Stable for 2 years at -20°C from date of shipment. Rehydrated: Stable for 6 months at -20°C. For maximum recovery of the product, centrifuge the original vial prior to removing the cap.

Species Cross-reactivity: Rabbit.
