Certificate of Analysis

Rat Brain Microsomal Prep.

Catalog # 12-144

Lot # 21682

Product Description: Rat brain microsomal proteins containing Na⁺/K⁺-ATPase α and β subunits dissolved in homogenization buffer.

Formulation: 400mg in 80ml of 250mM sucrose, 30mM histidine and 1mM PMSF. Concentration: 5 μ g/ μ l. Frozen solution.

Storage and Stability: Stable for 2 years at -70°C from date of shipment for undiluted solution.

Recommended Use for Immunoblot Analysis: Load \geq 40 μ g per lane in SDS-PAGE sample buffer. **DO NOT BOIL.** Heat the microsomal protein prep. in sample buffer at 37°C for 30 minutes and centrifuge the original vial prior to aliquotting the sample.

**FOR RESEARCH USE ONLY
NOT FOR USE IN HUMANS**
