

## Certificate of Analysis

**Visualizer™ Western Blot Detection Kit, rabbit  
Chemiluminescent System**  
Catalog # 64-202  
Lot # DAM1650045

### Kit Components

**Goat Anti-Rabbit IgG, HRP-Conjugate,**  
Catalog # 12-348 One vial containing **500µg** of goat  
IgG, conjugated with horseradish peroxidase  
lyophilized from 0.02M potassium phosphate, 0.15M  
NaCl, pH 7.2, 10mg/ml BSA, 0.01% (w/v) gentamicin  
sulfate. For rehydration add 500µl of sterile, distilled  
water containing 50% glycerol to make a 1mg/ml  
stock solution. See page two for more information.

**Note: This product is light sensitive.**

**Visualizer™ Detection Reagent A,** Catalog #  
20-275a. One vial containing **20ml**.

**Visualizer™ Detection Reagent B,** Catalog #  
20-275b. Two vials containing **20ml** each.

**Note: Visualizer™ components are light sensitive.**

**FOR RESEARCH USE ONLY  
NOT FOR USE IN HUMANS**

---

### Kit Description

**Product Description:** The Visualizer™ Western Blot Detection Kit, using the provided HRP conjugated secondary antibody and detection reagents, is designed for the sensitive detection of proteins in chemiluminescent Western blots.

**Quantity:** 20 immunoblots per kit.

**Storage and Stability:** Stable for 18 months at 4°C from date of shipment. **Note:** Upon receipt, resuspend, aliquot and store Catalog # 12-348 at -20°C for optimal performance. Store Visualizer™ Detection Reagents at 4°C.

**Use:** Read the enclosed manual before use. Visualizer™ Western Blot Detection reagents are very sensitive and optimization of the individual assay components (antibodies, conjugates, membranes, etc.) need to be completed to minimize non-specific reactivities and supply the most robust results.

**Quality Control Testing:** The reagents in this kit have been matched to optimize the range and sensitivity of detection using various antibodies in Western blot assays.

**Visualizer™** is a trademark of Upstate USA, Inc.

### **Technical Information for Kit Components**

#### **Goat Anti-Rabbit IgG, HRP-conjugate (goat polyclonal IgG)**

**Immunogen:** Highly purified whole rabbit IgG.

**Specificity:** Specific for rabbit IgG heavy and light chains.

**Species Cross-reactivity:** Rabbit.

**Use:** A working dilution of 1:10,000 is recommended for Western blot detection with this kit, but optimal dilutions should be determined for each system. If background detection is high, further dilution may be necessary.

**Physical Form:** Lyophilized powder.

**Storage and Stability:** Lyophilized: Stable for 2 years at -20°C from date of shipment. Rehydrated: Stable for 6 months at -20°C. For maximum recovery of the product, centrifuge the original vial prior to removing the cap.

Unless otherwise stated in our catalog or other company documentation accompanying the product(s), our products are intended for research use only and are not to be used for any other purpose, which includes but is not limited to, unauthorized commercial uses, in vitro diagnostic uses, ex vivo or in vivo therapeutic uses or any type of consumption or application to humans or animals.
