Certificate of Analysis

PI3 Kinase (p120 γ)

(Recombinant enzyme expressed in Sf21 insect cells)

Catalogue # 14-558

Lot # D8CN080U

Product Description: N-terminal 6His-tagged recombinant full-length human PI3 kinase (p120 γ) expressed by baculovirus in Sf21 insect cells. Purified using Ni²⁺/NTA-agarose. Purity 90.1% by SDS-PAGE and Coomassie blue staining. MW = 130kDa.

Specific Activity (lot# D8CN080U): 63U/mg, where one unit of PI3 Kinase (p120 γ) activity is defined as 1nmol phosphatidylinositol 3,4,5-trisphosphate formed per minute at 22°C with a final ATP concentration of 100 μ M.

Formulation: 20 μ g of enzyme in 9.4 μ l of 50mM Tris/HCl pH7.5, 150mM NaCl, 10% glycerol, 0.1mM EGTA, 2mM DTT.

Storage and Stability: Store at -70°C from date of shipment. For maximum recovery of product, centrifuge original vial prior to removing the cap.

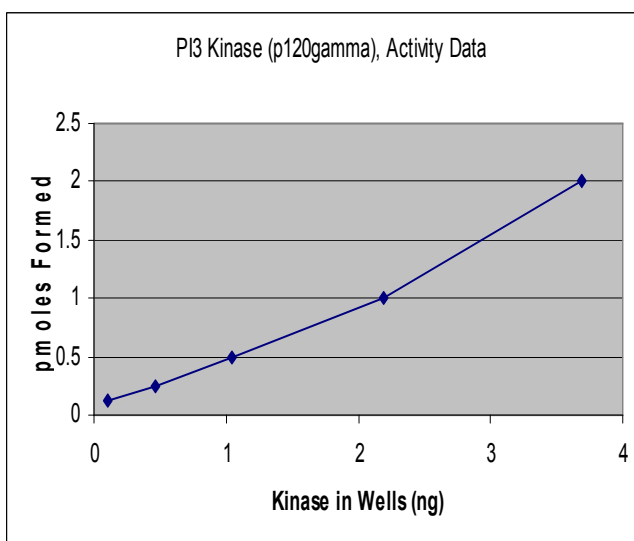

Handling Recommendations: Rapidly thaw the vial under cold water and immediately place on ice. Aliquot unused material into pre-chilled microcentrifuge tubes and immediately snap-freeze the vials in liquid nitrogen prior to re-storage at -70°C.

**FOR IN VITRO RESEARCH USE ONLY
NOT FOR USE IN HUMANS OR ANIMALS**

Quality Control Testing

Kinase Assay: 0.125–2.0ng of this lot of PI3 Kinase (p120 γ) was assayed in a 30 minute reaction using the PIPProfiler™ protocol (see <http://www.upstate.com/features/pipprofiler>).

MS Tryptic Fingerprint: Confirmed identity as PI3 Kinase (p120 γ) with 23% amino acid coverage of the translated sequence listed on page two.

SDS-PAGE and Coomassie Stain: Purity was assessed by SDS-PAGE and Coomassie blue staining using 3 μ g of active PI3 kinase (p120 γ).

P13 Kinase (p120 γ) Sequence Information

Protein	human P13 Kinase (p120 γ)
Tags	N-terminal 6His
Native sequence	M34 of the recombinant protein is equivalent to M1 of human P13 Kinase (p120 γ)
Accession number	GenBank AF327656. The recombinant protein contains the amino acid substitution R459Q with respect to this accession number. This conflict is reported in GenBank XM_027912. The residue coordinates in the native sequence are given.
