

Statement of Animal Origin

Catalog Number: 14442AM

Item Description: YM Discs 100K NMWL 76MM 10PK

Based on the information received from our suppliers, some raw materials contain animal derived materials. The information we have received from our suppliers is summarized below:

A raw material contains a tallow-derived material that originates from bovine sourced from the United States and Mexico. The supplier has stated the following processing conditions for the tallow-derived material: saponification with NaOH 12M: Batch Process at not less than 95°C for not less than 3 hours. The processing conditions meet the requirements of the "Note for Guidance on Minimising the Risk of Transmitting Animal Spongiform Encephalopathy Agents via Human and Veterinary Medicinal Products" (EMEA/410/01 Rev. 2).

A raw material contains calcium stearate used as a trace stabilizer derived from animal fat that originates from animals sourced from the United States, Canada and Mexico. The supplier has stated the following processing conditions for the fat-derived material: multi-step chemical treatment involving high temperatures, high pressures, and long residence times. The processing conditions meet the requirements of the "Note for Guidance on Minimising the Risk of Transmitting Animal Spongiform Encephalopathy Agents via Human and Veterinary Medicinal Products (EMEA/410/01 Rev. 2).
