

Statement of Animal Origin

Catalog Number: CVHL53TP3

Item Description: DURAPORE .45 30IN CD5 3/PK

Based on the information received from our suppliers, some raw materials contain animal derived materials. The information we have received from our suppliers is summarized below:

A raw material contains a tallow-derived material that originates from animals sourced from the United States, Canada or Mexico. The supplier has stated the following processing conditions for the tallow-derived material: the processing conditions meet the requirements specified in the "Note for Guidance on Minimising the Risk of Transmitting Animal Spongiform Encephalopathy Agents via Human and Veterinary Medicinal Products" (EMEA/410/01 Rev. 2)

A raw material contains a tallow-derived material that originates from bovine sourced from the United States and Canada. The supplier has stated the following processing conditions for the tallow-derived material: trans-esterification or hydrolysis at not less than 200°C for not less than 20 minutes under pressure, and distillation at 200°C. The processing conditions meet the requirements of the "Note for Guidance on Minimising the Risk of Transmitting Animal Spongiform Encephalopathy Agents via Human and Veterinary Medicinal Products" (EMEA/410/01 Rev. 2).

A material that contacts the product contains a tallow derived by-product derived from bovine sourced from the United States and Germany. The suppliers have stated the following processing conditions for the tallow-derived material: trans-esterification or hydrolysis at 200°C for not less than 20 minutes under pressure, and distillation at 200°C. The supplier states the processing conditions meet the requirements of the "Note for Guidance on Minimising the Risk of Transmitting Animal Spongiform Encephalopathy Agents via Human and Veterinary Medicinal Products" (EMEA/410/01 Rev. 2).

A raw material contains a tallow-derived material that originates from bovine sourced from the United States. The supplier has stated the following processing conditions for the tallow-derived material: trans-esterification or hydrolysis at not less than 200°C for not less than 20 minutes under pressure. The supplier has stated that the animal is fit for human consumption. The processing conditions meet the requirements of the "Note for Guidance on Minimising the Risk of Transmitting Animal Spongiform Encephalopathy Agents via Human and Veterinary Medicinal Products" (EMEA/410/01 Rev. 2).
