

Catalog Number: CDUF001LA

Item Description: Prep/Scale-TFF PLAC 1 sq ft 1k

Based on the information received from our suppliers, some raw materials contain animal derived materials. The current information that we have received from our suppliers is summarized below:

A raw material contains a fatty acid and a tallow-derived material that originates from bovine sourced from the United States and Canada. The supplier has stated the following processing conditions for the fatty acid and tallow-derived material: trans-esterification or hydrolysis at not less than 200°C for not less than 20 minutes under pressure. The fatty acid is treated under a condition over 200°C for 60 minutes. The processing conditions meet the requirements of the "Note for Guidance on Minimising the Risk of Transmitting Animal Spongiform Encephalopathy Agents via Human and Veterinary Medicinal Products" (EMEA/410/01 Rev. 2).

A raw material contains a tallow-derived material that originates from bovine sourced from the United States and Mexico. The supplier has stated that the animal is fit for human consumption. The supplier has also stated the following processing conditions for the tallow-derived material: trans-esterification or hydrolysis at not less than 200°C for not less than 20 minutes under pressure, and distillation at 200°C. The processing conditions meet the requirements of the "Note for Guidance on Minimising the Risk of Transmitting Animal Spongiform Encephalopathy Agents via Human and Veterinary Medicinal Products" (EMEA/410/01 Rev. 2).

#### Quality Assurance

*Millipore Corporation continues to survey its suppliers to determine if the requirements of the "Note for Guidance on Minimising the Risk of Transmitting Animal Spongiform Encephalopathy Agents Via Human and Veterinary Medicinal Products" (EMEA/410/01 Rev. 2) are met.*
