

**RABBIT ANTI-SURVIVIN (N-TERMINAL) [TIAP / API4]
POLYCLONAL ANTIBODY**

CATALOG NUMBER: AB16532

LOT NUMBER:

QUANTITY: 100 µg

CONCENTRATION: 1 mg/mL

SPECIFICITY: Apoptosis, or programmed cell death, is related to many diseases, such as cancer. Apoptosis is triggered by a variety of stimuli including members in the TNF family and prevented by the inhibitor of apoptosis (IAP) proteins. IAP proteins form a conserved gene family that binds to and inhibits cell death proteases. A novel IAP protein was recently identified and designated survivin, apoptosis inhibitor 4 (API4) and TIAP¹⁻³. Survivin/TIAP interacted with the processed form of caspase-3 and inhibited its proteolytic activity. Survivin/TIAP is predominantly expressed in tissues of embryos, transformed cell lines, and many human cancers and lymphomas¹.

IMMUNOGEN: Rabbit anti-Survivin (N-terminal) polyclonal antibody was raised against a peptide corresponding to amino acids 1 to 12 of human origin¹.

APPLICATIONS: Western blot: 0.5 to 1 µg/mL.
MOLT4 cell lysate can be used as positive control and an approximate 17 kDa band should be detected.
Optimal working dilutions must be determined by end user.

FORMAT: Purified immunoglobulin

PRESENTATION: Liquid in PBS containing 0.02% sodium azide.

STORAGE/HANDLING: Maintain at 2-8C in undiluted aliquots for up to 12 months.
